

## STERIL-AIRE UVC AIR QUALITY PROTECTION EFFECTIVE WITHOUT POTENTIAL HEALTH CONCERNS FROM OZONE

*“Ozone is a gas that can cause health problems, including respiratory tract irritation and breathing difficulty. Not all air-cleaning devices are appropriate for use – some can be harmful to human health.”\**

Many states have passed laws with stringent regulations regarding ozone generators. Steril-Aire’s systems-engineered UVC Emitters are the perfect solution for retrofit or new HVAC systems in food processing systems, cannabis growing, schools and healthcare facilities. They produce no ozone or secondary contaminants. In addition to being environmentally friendly, they offer an average payback within 24 months (or less) of installation.
